

Celebrate your Senior Pet

If your pet is 7 years old or older, then we consider them a “A Senior”.

Your pet may seem healthy through its senior years, but sometimes many age-related problems may not be apparent until the illness has advanced.

An aging pet's organs gradually deteriorate and may lose their ability to function properly. We use senior testing to promote early detection and treatment of diseases, so we can maintain health and prevent illness during your pet's senior years. Early detection of disease often give us more effective and less costly treatment options. And senior testing helps establish normal baseline values for your pet, creating a point of comparison for the future.

Together we can help your cat or dog live a long active and comfortable life. Early diagnosis and intervention often minimizes suffering and enhance the quality of life for our furry friends. The Celebrate your Senior Pet Package checks for health and abnormalities.

Luv-N-Care Animal Clinic have designed this package so that we have the medical information necessary to guide you on the most appropriate care and actions to take the best care of your pet and ensure the live happy and healthy lives.

More details are available on the web page or from the veterinarian and technician.

Celebrate your Senior Pet

It's hard to believe that our pets are considered Seniors at just 7 years of age. As they age, our pets become more susceptible to Senior diseases like Diabetes and Kidney disease. Senior blood work can help catch these diseases in their early stages, providing more options for treatment.

Helping your senior live a longer, happy life.

Physical Exam
Urinalysis
Fecal
Nail Trim

Total Health with BNP profile
Full Body X ray (4 views)
Anal Glands Expression
Ear Cleaning

***Normal cost: \$658.87
